

Our Goal – Truck dumped every 2.5 minutes

We would like to offer these dumping instructions to help improve our dumping efficiency and service to our customers.

- Please keep a double line as long as both probes are open.
- Please keep lines tight.
- When you are the next truck in line to pull under the probe please have your load untarped (weather permitting), so you are ready to be sampled once you pull under the probe.
- Please have the following information ready when you pull up to the Intercom/Probing station:
 - Customer or Elevator Name
 - Bill of Lading number (if you are hauling for another elevator)
 - For first time customers, DSI sheets **must** be filled out prior to dumping and given to scale operator
 - All split loads must have a DSI sheet with it. Note: If other information is needed for the load, it must be on a DSI sheet.
 - Please tell us how the beans are to be sold. **Example: contract, spot, price later, open delivery.** Loads not specified will be spotted at the close of the following day of unload.
 - Trucking Company
 - Truck License Plate number
- Pull up to the proper intercom and our associate will ask you for the above information.
- Once we have taken a probe sample of your soybeans you will be given the green light to pull ahead to be dumped. (Please look in your mirror to make sure the probe has been taken out of your vehicle).
- When you pull on the scale to dump, please stay in your truck until you are given the green light. When the green light comes on you can get out and start dumping your beans.
 - If you have a semi hopper please open both hoppers when you are unloading. **Starting with the back hopper first! – WIDE OPEN!**
- Please give your DSI or Bill of Lading to our associate that is assisting with the grain dumping.
- As soon as you are done dumping go to the blue box at the front of the scale, your ticket will print out on the printer inside the box as soon as the tare weight is complete.
- Please stay on the scale while you are waiting for your ticket to print.
- Once you have your ticket, you are ready to go. Please follow the tar road exiting through the plant.
- Please obey all speed limit and stop signs in our facility.
- Have a Safe Harvest.
